PROFESSIONAL SUMMARY

Experienced backend developer proficient in Laravel and MySQL, with a solid foundation in Vue.js.Known for solving complex problems with precision and effectively col laborating, I am driven by a passion for innovation and continuous growth, eager to contribute to impactful projects and embrace emerging technologies.

EDUCATION

Bachelor of Information Technology, University Of Gujrat 2017 - 2021
Relevant CourseWork: Object-Oriented Programming, Data Structures and Algorithm, Operating System, Software Design and Analysis. Database, Web Programming. Information Security. Networking, Cloud Computing.

SKILLS

Backend Development:	PHP, Laravel
Frontend Development:	HTML, CSS, Bootstrap 5, JavaScript, Vue.js
Database Management:	MySQL, Eloquent ORM
Tools Version Control:	Git, Postman, Composer, npm, Visual Studio Code
API Development:	RESTful APIs, Third-Party API Integration, CRUD Operations
Core Concepts:	Object-Oriented Programming (OOP), Data Structures & Algorithms, Problem-Solving & Analytical Thinking, Debugging & Troubleshooting
Collaboration:	Team Collaboration, Communication

EXPERIENCE

Software Engineer July 2022 - Present
Abacus Consnulting, Lahore

- Worked on multiple client projects, delivering high-quality web solutions.
- Engaged in the full software development lifecycle from planning to deployment.
- Improved application performance and user experience through regular updates and optimizations.
- Collaborated with cross-functional teams to design and deploy software solutions, improving system efficiency and user satisfaction.

- **Skills:** PHP, Laravel, SQL/MySQL, Postman, JavaScript, Vuejs, DataTable, JQuery, GitHub.

Full Stack Developer Dec 2021 - June 2022
Appcrates, Gujranwala

- Understanding MVC architecture, routing, and middleware
- Designing and optimizing databases using MySQL with Eloquent ORM.
- Using Blade templates, Bootstrap, and integrating frontend components

- **Skills:** PHP, Laravel, SQL/MySQL, JavaScript.

PROJECT

QMS – Quality Management System **PHP, Laravel, Mysql, Bootstrap**

- **Tech Stack:** Developed using **Laravel** for backend, MySQL for database management, and DataTables for efficient data presentation.

- **User Roles:** Implements secure, multi-role access for users, creator, authorizer, recommendation owners, viewers and admin.
- **Evaluation management:** Enables users to create, schedule, and manage forms for evaluation.
- **Admin Dashboard:** Manages forms, user data and analytics.
- **Dynamic Data Handling:** Implemented server-side DataTables for efficient processing of large datasets.
- **Optimized UI/UX:** Improved user experience with interactive filters, search, and dynamic actions.

TMS – Ticket Management System   **Vue.js, PHP, Laravel, Mysql**

- **Tech Stack:** Built using **Laravel (backend)** and **Vue 3 (frontend)** . This is my **first project using Vue 3**, focusing on modern, scalable development.
- **User Roles:** Implements secure, multi-role access for users.
- **Multi-Language Support:** Available in English and Arabic.
- **Admin Dashboard:** Manages tickets, user data, complains, and platform analytics.
- **Complain booking:** Allows users to submit, trace, and view their complains with real-time availability.
- **Multi-Platform Support:** Provides seamless access across web and mobile with multi-language support.

IMS – Inventory Management System   **Bootstrap, PHP, Laravel, Mysql**

- **Core Development:** Developed and maintained core inventory operations using **Laravel**, including product tracking, stock adjustments, and reporting.
- **Barcode Integration:** Implemented barcode scanning for streamlined inventory entry and real-time stock updates.
- **Role-Based Access Control:** Designed a secure multi-role system (admin, manager, staff) with tailored permissions.
- **Stock Alerts and Notifications:** Built automated low-stock alerts and restock reminders via email and in-app notifications.
- **Reporting and Analytics:** Generated real-time reports on stock levels, item movement history, and supplier performance.
- **Supplier and Purchase Order Management:** Managed suppliers, purchase orders, and deliveries with integrated status tracking.
- **Admin Dashboard:** Developed a comprehensive admin dashboard for overseeing inventory levels, user activity, and transaction logs.

GCL – Galapagos Cruise Links   **Laravel , Mysql**
GCL

- **Core Development:** Built core booking functionalities using **Laravel**, including real-time ship availability and reservation management.
- **Payment Integration:** Integrated Stripe and PayPal for secure transactions with automated billing and invoicing.
- **Cruise and Cabin Management:** Developed modules for managing ships, cruise schedules, cabin types, and availability.
- **Admin and Agent Portals:** Designed separate portals for administrators and travel agents with role-specific access and features.

ACHIEVEMENTS AND STRENGTHS

- **Optimized database queries** , reducing load time by **30%** and enhancing overall performance.
- Successfully **delivered multiple major projects** within **deadline** and with client satisfaction.
- Demonstrated **strong problem-solving** by resolving complex API integration challenges.
